

LLumin Version 22.10 Release Notes

Inventory Management

Serial Number Finder

- We addressed an issue preventing the User column from displaying in certain circumstances.

Request for Quote Report

- When clicking the Print button on Purchase Requests or Purchase Orders prior to being released, the application will now use the Request for Quote form rather than the Purchase Request or Purchase Order form. After release, the previous forms will be used.

Minor Improvements

- Within the Item Master, we have made the PO Number in the “Open Orders” card a clickable link to the Purchase Order record.
- We have addressed an issue preventing Projects from being finalized in certain circumstances.
- We have updated the security permission for View rights on Configuration Mode to not allow editing.
