

LLumin Version 22.11 Release Notes

Inventory Management

Vendors

- We addressed an issue where a user could create a Purchase Order from within the Item Master against an Inactive Vendor.

Purchase Orders

- We have added a system configuration to allow users to edit Purchase Orders in a Partially Received status. It is not enabled by default (i.e. users cannot edit Purchase Orders in Partially Received status).

Work Management

Assets

- We have improved the functionality to edit Asset downtime data to better account for different scenarios.
- We have addressed an issue preventing Work Order completion based on a failed validation with an Asset's Manufacturer.

Minor Improvements

- We have made minor performance enhancements and minor front end improvements.
