LLumin Version 22.12 Release Notes

Work Management

Labor Time

- We have added a new menu option under Configuration Mode -> Asset & Work Management to allow users to configure different Labor Time Types. This will include the ability to set the time multiplier, one example would be Overtime at 1.5 times the normal labor rate.

Minor Improvements

- We have addressed various maintenance issues as reported through the LLumin Support portal.
- We have made improvements to the HMI plugin and GIS import functionality.
- We have made minor performance enhancements and minor front end improvements.
