

LLumin Version 23.5 Release Notes

Assets & Work Management

Various Updates

- We have made major improvements to the Data Collection Steps functionality within Procedures to allow steps to move from one group to another, to show additional steps based on the responses entered, and we have added functionality to send email notifications based on the responses entered.
- We have added a default Due Date system configuration for when a Recurring Work has Utilization-Based triggering.

Materials Management

Various Updates

- We have added a new label field for the Date Received which will show the current date on the printed labels.
- We have added the Serial Number column to the View Issues results grid.
- We have added the Qty Returned to the Issue History grid.
- We have added transaction logging for Vendor Address changes.

Minor Improvements

- We have addressed an issue wherein Asset Status changes made within the LLumin disconnected mobile app did not sync to the core application.
- Various performance and visual improvements.
