

LLumin Version 23.8 Release Notes

Assets & Work Management

Various Updates

- We have made updates to the Recurring Work functionality to automatically link Safety forms to the Work Orders that get triggered from Recurring Work entries.
- We have added the Division value to the Work Order number field on the workflow approval email notification.
- We have added the Asset Description to the Asset on the Asset Map View screen to provide better visibility.
- We have added functionality to allow users to add files to Completed Work Orders or Work Orders Awaiting Approval with configured system settings and Update/Approval user permissions.
- We have added the Equipment ID on the Asset information within a Work Order record.
- We have added a dynamic label on the Prework Checklist to match the Work order Type.
- Assets with Issued Components now show under the WO Asset for the Components that contain the same functionality as from within the Asset record itself (i.e. you can remove the Components from the Asset Location). The user must have Asset View and Item Adjust permissions to utilize the functionality as outlined.

Materials Management

Various Updates

- We have added an Expiration Date field on Serialized Items on the Purchase Order Receiving screen.

Minor Improvements

- We have addressed an issue wherein the page numbers and page arrows were not functioning as expected.
- Various performance and visual improvements.
