LLumin Version 23.9 Release Notes

Assets & Work Management

Various Updates

- We have added Asset User Defined Fields 21 through 50 and other additional Asset fields to the Work Order Finder.
- We have added support to define the default Schedule Type based on the Work Order Type selected on the Work Order creation screen.
- We have added underlying code to improve the visual experience of the Work Order master screen and Condition Assessment screen on smaller screen resolutions and mobile devices.
- We have added a Work Request pre-work checklist that is required prior to a Work Request submission.

Materials Management

Various Updates

- We have added support for a custom Item label template for both Zebra and Dymo printers.

Minor Improvements

- We have addressed an issue wherein the Work Order Sub-Status field was not updating in specific circumstances.
- Various performance and visual improvements.
