

How to Use Grids

Grids are a type of homepage tile on your LLumin CMMS+ dashboard that provide a detailed table view of items such as Assets and Work Orders. Like Finders, Grids offer a range of actions to help you manage and customize your data efficiently.

Instructions

Grids provide the following options, as well as many of the actions available in the associated Finder:

1. **Configure Columns:** Show or hide columns in the Grid to customize your view.
2. **View in Finder:** Opens the associated Finder with the Grid's filters already applied.
3. **View in Popup:** Displays the Grid in a separate window for easier viewing.
4. **Maximize / Shrink:** Expands or restores the size of the Grid.
5. **Information:** Provides a description of the type of Grid.

- You can minimize grids by clicking the title or header of the Grid. If there are multiple pages, use the arrows or page numbers at the bottom left to navigate.
- Grids, like other homepage tiles, can also be filtered by clicking the Filters button near the top, allowing you to tailor the displayed data to suit your needs.
