

## LLumin September 2019 Release Notes

### Application Set-Up / Configurations / General

#### Application Update

##### Title: Banner Messages for LLumin Notices

- When software updates are introduced, a Banner Message will appear on the homepage of the software.
- This message will announce the date of the update as well as a link to the Support Portal (<https://llumin.zendesk.com>) where Release Notes will be housed going forward.
- The message will appear just once, the first time a user logs in after the Banner has been posted.
- This Banner Message will be used initially to announce Monthly Maintenance Releases but could be used more broadly going forward.

##### \*Sample Banner Message

### READYAsset

#### Asset Improvements

##### Title: Asset Finder Manufacturer Column Fix

- The Manufacturer Column in the Asset Finder is now showing the Manufacturer Name, not the Manufacturer ID.

#### Work Order Improvements

##### Title: Import Duplicate Entries

- When adding duplicate records for labor time or equipment usage, the validation will fail and inform you why.

##### Title: Deleting Work Orders

- For a Work Order with required parts (but no issued parts or labor time) you are now able to delete it.
- The "delete alert message" was modified to add that Work Orders cannot be deleted when there is associated labor or parts usage.

##### Title: No Due Date for a Down Work Order

- Enabled functionality to leave the due date blank on a downed Work Order.

##### Title: Next Button Entering Labor Time

- The "Next" button on the Labor Time Completion pop-up did not consistently work as expected. This issue has been fixed.

##### Title: Reopen "Closed Not Complete" Work Orders

- You are now able to reopen Work Orders with a status of "Close Not Complete".

**Title: "Email When Down" functionality in Asset Master**

- When an Asset's status changes from a non-down status to a down-status, emails will be sent if the "Notification Email Address" and "Email When Down" fields are specified in the Asset Master.

<b>READYTrak</b>
------------------

**Inventory Module Improvements****Title: Inability to Delete an Unused Item Class from Details**

- A user is now able to delete an unused Item Class.

**Title: Default the "Issue to" when issuing inventory**

- A configurable option has been added that when turned on, would set the "Issue To" field to the currently logged in user.
- When the configuration is turned off, the field will be blank.

**Purchasing Improvements****Title: Duplicate Vendors**

- If you attempt to create a vendor that already exists, the application will provide a meaningful, detailed error message.

**Title: Auto Create Purchase Orders**

- Once the last approval on a Purchase Requisition is satisfied, the Purchase Order is created.
  - This is a user configurable option called "AutoCreatePOFromApprovedReq".
- The resulting Purchase Order is finalized.
  - This is a user configurable option called "AutoFinalizePOFromReq".
- The Workflow Module is evaluated on Purchase Orders built from Requisitions.
  - This is a user configurable option called ReqApprovalOnReqPOs

**Title: Vendor Drop Down**

- The Purchase Order Entry Screen's Vendor drop-down includes both Vendor Class SUPPLIER and Vendor Class VENDOR.

<b>Modules &amp; Interfaces</b>
---------------------------------

**Title: Workflow Module Compatibility \* Firefox Browsers Only**

- Approval buttons now appear as you would expect in the Workflow approval process.
