

LLumin Version 21.1 Release Notes

READYAsset

Assets

- We have added a date field under the TPM Assessment grid to allow for users to set the date it was recorded.
- We have addressed an issue preventing Asset changes from being saved in specific circumstances.

WO Calendar View

- We have added Work Requested and Asset Code/Description fields to the Day, Work Week, and Week calendar views.
- We have addressed an issue preventing the calendar from loading in Day View.

READYTrak

Item

- We have improved the Item creation screen to allow an Item flagged as “Non-Inventory” to be created with a Stockroom/Location.

Minor Improvements

- We have added a maximize button to Home Page Dashboards and Home Page WO Calendar views to make them more user-friendly.
- We have updated the “Open WOs Exist” list to include Work Orders where the Schedule Type is “Planned”.
- We have updated the PO Pending Approvals Home Page Grid to improve performance.
- We have added international phone number support to the Vendor Address screen.
