Resolved Issues**Error! Bookmark not defined.**

Improvements

- Added a **Lead Assigned To** filter in the Work Order Finder, allowing users to filter work orders by assigned leads. Updated the homepage **My Assigned WOs** tile to align with the new filter.

- Added the ability to **link Work Order Definition and assets** together, allowing users to easily select relevant definitions based on equipment.
- Added a **system configuration** to enforce sequential completion of work order procedures, ensuring compliance with safety protocols like LOTO and permits. Technicians can only proceed to the next step after completing all prerequisites.

- Included item images in the **Cycle Count** screen details for easier visual identification.

- We've enabled User Defined Fields 11-20 for recurring work. Changing the work order type will automatically update these fields.

The screenshot shows a 'RW 2067' work order form. Fields include:

- WO Type:** Work Order Type 1
- Craft:** Maintenance Technician
- Shift:** Second
- Priority:** Highest
- Work Requested:** Test - please ignore
- Estimate:** 4.50
- Historical Analysis:** 0 Hrs. 0 Mins.
- Lead Assigned To:** Gordon Freeman
- Send Notification Emails to:** (empty field)
- z 1:** (empty dropdown)
- UDF2:** (empty dropdown)
- Apostrophe's:** (empty dropdown)
- UDF-5:** (empty dropdown)
- Invoice Export Date:** (calendar icon)
- UDF 11:** (empty dropdown)
- UDF 14:** (empty dropdown)
- WOType 1 Testing 15:** (empty dropdown)
- Test 17:** (empty dropdown)

- Added a **Remaining Quantity** field to the PO Lines Grid for Blanket POs.

- Added a new "Close" option to **manually close Blanket POs**. Also, updated the "Cancel" option to apply only to statuses below Released.

- Expanded **Trigger Info** card functionality to allow suppression of Recurring Work for more than one month.
- We **removed item validation when deleting a kit**, as kits automatically break down into individual items when used.
- Updated **Blanket PO approval** functionality to require users to save changes before approving, ensuring changes do not invalidate approval rules.
- Enhanced **Operator and LLite licenses** by adding Map View and Facility View to the Asset Menu and a Serial Items Inquiry to the Inventory Menu for improved navigation and functionality.

Resolved Issues

- Resolved various issues to improve overall system stability and performance. These updates are part of our ongoing commitment to enhancing your experience.
