Spotlighted New Features

Introducing our new **Admin Mode!** Admin Mode is now available to streamline system management, making settings and configurations easier to access and manage. Learn about Admin Mode on our Support Portal.

Advanced Multilingual Capabilities. This feature enhances accessibility and usability for a global audience by expanding our Basic Multilingual Support, allowing users to translate user-created data.

Advanced Multilingual Capabilities (continued)

Basic Multilingual Support:

- Set a preferred language for all system-controlled text, including labels, titles, pop-ups, and menus.

New Advanced Multilingual Capabilities:

- Translate user-entered fields such as asset names, procedure detail, and item descriptions.
- Support for drop-down values and other configurable fields where translation applies.

Location-based Language Settings:

- Assign a primary and alternate language per location.
- **Example:** A plant in Mexico can have English as their primary language and Spanish as the alternate, while a Quebec plant may use French as primary and English as the alternate.

More New Features

- **GIS Map View Enhancements**

- Users can now easily filter work orders assigned to them by clicking the new **"My Open Work Orders"** button in the GIS Map View.

- **Purchase Order Notifications**

- We've added a new system setting that allows you to **configure email notifications for PO releases** with the new Purchase Order Release Email(s) setting.

Setting	Option	Description
PunchOut Default Item Number	<input type="text"/>	Default item number to use when an item is purchased through the punchout functionality.
Purchase Order Release email(s)	POCreator X	List to email when a Purchase Order has been released. The fields under 'Dynamic LLumin Fields' will pull the email addresses from those fields linked to the PO that is being released.
Purchase Price Calculation	Vendor X	Items added to a Purchase Order will use this order to determine their price (Default is Vendor Best, Last Vendor Order, Last Order, Last Item Order)

Other Improvements

- The **Item** column in the **Item Reorder List** is now a **clickable link** that navigates directly to the item's details. The View Item button has been removed from this screen.

Item	Description	Qty To Order	Edited
62CA-101DM-N-SETR	24 Size N 101 Cavity Mold Set (Remanufactured)	1 Each	
ACID0001	Hydrochloric Acid 1 L Bottle	6 Each	

- We have added enhanced support for the **German language** in LLumin, ensuring a seamless experience for our users in the German-speaking regions.
- Improved item cost visibility by adding the **UOM Conversion Factor** to the Item Costs card, including the Purchase Unit to Stock Unit conversion.

Purchasing
Available Qty: 33
Open Purchase Orders: 6
Vendors: 0

Reordering

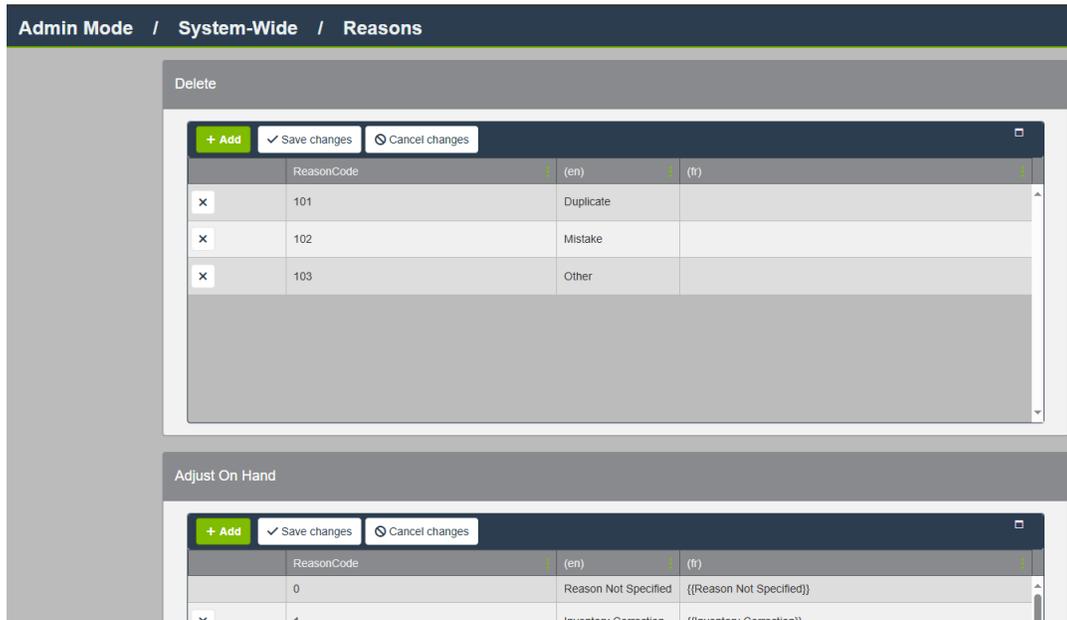

Costs

Stock Unit: Each | Purchase Unit: Case of 10 | Conversion: 1 CS10 → 10 EA

- We added the **Work Order Scheduled Start Date** field to the Reservations Finder.

Reservation	Item	Work Order #	On Hand	Bin	Due Date	Date Scheduled	Item C
108198	ANDRE... Andrew Part 1	442497	28	R1: 28	6/27/2024	1/27/2025	Andrew

- The **Reason setup screen** in Admin Mode has been updated and now includes an 'Add' button, allowing users to create custom Reason Codes alongside default options.

- Added **UDF filter fields** to the PO/Requisition, Item Reorder List, and Issue/Reservation Finders.
- The **HMI Role has been renamed** to Operator Role, and the Integration Role has been removed.

Resolved Issues

- Resolved various issues to improve overall system stability and performance. These updates are part of our ongoing commitment to enhancing your experience.
