# Spotlighted New Features

## Multi-Work Order Completion

Complete multiple work orders in a single workflow from the Work Order Finder or homepage grids, reducing repetitive steps and screen switching.

- Complete button now remains available when multiple work orders are selected
- Record and allocate labor time across multiple work orders at once
- Streamlined tab flow improves navigation through required completion steps
- Update statuses, inspections, and quality steps for multiple work orders in one pass

The screenshot displays the 'Work Order Finder' interface with a 'Complete' modal open. The modal is titled 'Work Order 327540, 327557, 327565, 327577, 327580' and includes tabs for 'View', 'Create New', and 'Summary'. The 'View' tab is active, showing a progress bar with steps: Prework Checklist, Condition Assessment, Labor, Quality, Complete, and Continuous Improvement. The 'Labor' step is currently selected. Below the progress bar, the modal contains fields for 'Performed By' (Supervisor One), 'Labor Time' (0 Hrs, 0 Mins), and 'Start' (2/19/2026 9:27 AM). There is also a 'Time Type' dropdown set to 'Regular' and a 'Work Orders' list showing the selected work order IDs. A 'Repair Comments' section with a text area and an 'Add a File' button is also present. At the bottom of the modal, there are 'Allocation' options: 'Split' (selected) and 'Duplicate', along with a 'Validate' button. The background shows a grid of work orders with columns for WOI #, Asset ID, Status, Closed By, and Asset Type.

## Multi-Work Order Labor Time Entry

Enter labor time once and apply it across multiple work orders from the Work Order Finder or homepage grids, reducing duplicate entry and improving accuracy.

- Record labor for multiple selected work orders in a single action
- Split or duplicate entered time across selected work orders
- Enter Time action now supports multi-select from Finder and homepage grids

## Redesigned Purchase Order Master screen

The redesigned screen delivers a cleaner, more consistent layout with improved line-level visibility and a more intuitive editing experience.

- Line Items section is now the central focus for faster review and entry
- Dedicated line edit window improves clarity when updating quantities, costs, and related fields
- Reorganized panels provide quicker access to General, Vendor, and Summary information

## More New Features

- **Enhanced user interface across multiple screens** with updated toolbar behavior, improved layout consistency, and visual refinements.
- Added ability to **generate and print QR codes directly from the Asset Master** record, making it faster to label assets and support QR-based workflows.

- Users can now create **custom global filters** from the **Filters** tab in the **Map view**, allowing asset and work order data to drive map visualization with user-defined symbology.
  - Build filters using asset and asset-related fields, including work order data
  - Assign custom symbology to each filter for clearer map insights
  - Select multiple filters at once to highlight matching assets
  - Filters are global and visible to all users once created

# Other Improvements

## Work Orders

- Added a **read-only Work Request Estimate (hours)** field to the **Work Order Details** panel when a value exists.

The screenshot displays the 'Work Order' interface for work order 327761. The 'Details' panel on the right contains various fields including Contractor, Lead Assigned To, Shift, Schedule Type, Reason For Work, Location, Project, Task, Estimate (hours), and Work Request Estimate (hours). A green box highlights the 'Work Request Estimate (hours)' field, which contains the value '2.00'. A green arrow points from this field to the 'Work Request Estimate (hours)' field in the 'Details' panel.

- Added **Labor Timer Start** column and filters to the User / Role Finder to help track when users start labor timers. a

The screenshot shows the 'User / Role Finder' table with 55 records. The table has columns for ID, First Name, Last Name, Timer Start, Type, and User Role. The 'Timer Start' column is highlighted with a red box, showing the start times for three users: Tech1 (2/19/2026 12:11 PM), Tech3 (2/19/2026 12:10 PM), and Tech2 (3/11/2025 3:04 PM).

| ID     | First Name | Last Name | Timer Start        | Type     | User Role       |
|--------|------------|-----------|--------------------|----------|-----------------|
| Tech1  | John       | Smith     | 2/19/2026 12:11 PM | User     | Technician Role |
| Tech3  | Technician | Three     | 2/19/2026 12:10 PM | User     | Technician Role |
| Tech2  | Technician | Two       | 3/11/2025 3:04 PM  | User     | Technician Role |
| ACE-01 | Ace        | Electric  |                    | Employee |                 |

- Added a system configuration to **restrict Work Order completion to the assigned Lead**, displaying a message if another user attempts to complete the work order.

## Assets

- The Asset QR Scan page now includes **Enter TPM**, enabling users to start TPM checklists/procedures directly from the scan workflow.

The screenshot shows the 'SP-INJM-103: Injection Molding Machine 103' page. At the top, there are four buttons: 'Create WO Request', 'Create Work Order', 'Open Work Orders', and 'Enter TPM'. The 'Enter TPM' button is highlighted with a red box. Below it, a 'TPM Entry' form is open, also highlighted with a red box. The form contains two sections: 'OEE - Production Schedule' and 'OEE - Production Results'. The 'OEE - Production Schedule' section has fields for 'Scheduled production run hours' (with a unit dropdown set to 'HRS') and 'Planned production quantity'. The 'OEE - Production Results' section has fields for 'Total quantity produced', 'Number of defective units produced', and 'Total good units produced'. At the bottom of the form are 'Save' and 'Cancel' buttons.

- Added a **Preferred Vendor Part Number** column to the Parts History grid on Assets for improved part reference visibility.

## Reporting

Added the following new reports:

- **Added Purchase Requisitions** report to provide visibility and export capabilities for requisition data.
- **Added Asset Utilization Value Point-in-Time** report to show each asset's utilization value as of a selected date, including when and how it was last updated.
- **Added Inventory Count History** report to list approved cycle counts grouped by cycle number.
- **Added Assets QR Codes** report for mass printing asset QR codes for use with Quick Request and TPM features.

## Other

- **Improved mobile Operator Dashboard UI** with streamlined asset information access, updated action buttons, and clearer operator workflows.
- **Renamed configuration screens:** External Interfaces is now API Documentation, and Machine Interface is now Condition Monitoring, including related workflow labels.

## Resolved Issues

- Resolved various issues to improve overall system stability and performance. These updates are part of our ongoing commitment to enhancing your experience.
