

LLumin Version 22.7 Release Notes

Asset and Work Management

Work Order Type Management:

- We have added functionality to allow users without Assign permissions to assign Work Orders to themselves through an “Assign to me” link as shown below.

The screenshot shows a 'Details' panel with a right-pointing arrow icon. Below the title, there are two dropdown menus. The first is labeled 'Craft' and has 'Maintenance Technician' selected. The second is labeled 'Lead Assigned To' and has 'Please select...' selected. At the bottom of the panel, there is a blue link that says 'Assign to me'.

- We have updated the Work Order grid for Purchase Order details; the Purchase Order Number field is now a clickable link to open the relevant Purchase Order record.
- We have addressed an issue causing the “Elapsed Time” on the Work Order Summary card to calculate incorrectly.
- We have addressed an issue causing the Sub Reasons dropdown to be hidden in certain circumstances.

Asset Management

- We have updated the Performance History grid; the Work Order Number field is now a clickable link to open the relevant Work Order record.
- We have addressed an issue when Assets were re-coded that caused the attachments to unlink.
- We have addressed an issue that caused two fields to show without captions under the Financial Info card in certain circumstances.

Inventory Control & Item Tracking

Item Tracking

- We have added a “Go Back” button within the quick bar on Item records that will bring the user back to the Item Finder or previous screen as applicable.

Homepage

Filters

- We have added functionality to allow Homepage filters to persist when a user navigates away from the Homepage and back to it.

Minor Improvements

- The menu cards under Configuration Mode have been recaptioned from “READY...” to align better with overall module licensing nomenclature.
- We have addressed an issue preventing Certification expiration notifications from being sent in certain circumstances.
- We have improved the look of the GL Accounts screen under the Configuration Mode menu to allow better use of the available page size.
- We have addressed an issue within the Issue Finder causing Ext Price to show multiplied erroneously.
- Various enhancements, color scheme changes, defect fixes and performance improvements.
