LLumin Version 22.9 Release Notes

Asset & Work Management

Work Order Details Labor Entries

- Due to overwhelming feedback, we have rolled back the previous change to move the Labor entries back to the Work Completed card on the Work Order details screen.

Minor Improvements

- The Craft notification email will now include the user who is the Lead Assigned To.
- Addressed an issue preventing pasting into the Work order Repair Comments field in some cases.
- Addressed an issue with the link to Purchase Orders from within the Work Order details screen.
- Addressed an issue with the link to the Satisfaction Survey from within the Work Order details screen.
- Addressed an issue with the UTC conversion of specific Work Order Finder date filter fields.
- Improved the behavior with regards to Inactive Assets on Work Orders, the functionality will now mirror Active Assets.
- Improved the "POs Awaiting My Approval" homepage grid to include Closed or Invoiced POs that have outstanding approvals.
- Improved support for Russian language translation.
